SINAMICS V20

The cost-effective, reliable and easy-to-use inverter for basic applications

siemens.com/sinamics-v20

Answers for industry.

SINAMICS V20

The perfect solution for basic applications

SINAMICS V20, the versatile inverter for basic demands

Today, in an increasing number of applications in plant and machinery construction, individual automation and drive solutions are demanded that automate simple motion sequences with low associated requirements.

With its compact SINAMICS V20, the basic performance inverter, Siemens offers a simple and cost-effective drive solution for these types of applications. SINAMICS V20 sets itself apart with its quick commissioning times, ease of operation, robustness and cost-efficiency.

With four frame sizes, it covers a power range extending from 0.12 kW up to 15 kW.

Minimize your costs

Engineering, commissioning and operating costs as well as those in operation must be kept as low as possible. You have precisely the right answer with our SINAMICS V20. To increase energy efficiency, the inverter is equipped with a control technique to achieve optimum energy efficiency through automatic flux reduction. Not only this, it displays the actual energy consumption and has additional, integrated energy-saving functions. This allows energy consumption to be slashed drastically.

Highlights

Easy to install

- Push-through and wall mounting side-by-side possible for both
- USS and MODBUS RTU at terminals
- Integrated braking chopper for 7.5 kW to 15 kW

Easy to use

- Parameter loading without power supply
- Integrated application and connection macros
- Keep Running Mode for uninterrupted operation
- Wide voltage range, advanced cooling design and coated PCBs increase robustness

Easy to save money

- ECO mode for V/f, V²/f
- Hibernation mode
- DC coupling

Power range	0.12 kW to 15 kW
Voltage range	1AC 200 V 240 V (+ / -10 %) 3AC 380 V 480 V (+10 % / -15 %)
Control modes	V/f V²/f FCC

Typical applications

Pumping, ventilating and compressing			
 Centrifugal pumps Radial/axial fans Compressors 	 Additional advantages: High availability through automatic restart and flying restart after power failures Broken belt detection by monitoring the load torque Pump protection against cavitation Hammer start and blockage clearing modes for clogged pumps PID controller for process values (e.g. temperature, pressure, level, flow) PID auto tuning to optimize controller parameters Hibernation mode stops the motor when demand is low Motor staging extends the flow range by adding two more fixed-speed drives (cascade) Frost and condensation protection prevents moisture in motors under extreme environmental conditions 		
 Belt conveyors Roller conveyors Chain conveyors 	 Additional advantages: Soft, jerk-free acceleration reduces the stress on the gear units, bearings, drums and rollers Super torque start for conveyor belts with high breakaway torque Dynamic behavior by using braking resistor or DC braking Direct control of mechanical holding brake Broken belt detection by monitoring the load torque 		
 Single drives in the process industry such as mills, mixers, kneaders, crushers, agitators, centrifuges Main drives in machines with mechanically coupled axes such as ring spinning machines, braiding machines for textile, ropes and wire 	 Additional advantages: Frost and condensation protection prevents moisture in motors under extreme environmental conditions Higher productivity with uninterrupted production due to Keep Running Mode Exchange of regenerative energy via the DC link Super torque start for machines with a high breakaway torque 		
	 Centrifugal pumps Radial/axial fans Compressors Compressors Single drives in the process industry such as mills, mixers, kneaders, crushers, agitators, centrifuges Main drives in machines with mechanically coupled axes such as ring spinning machines, braiding machines, braiding machines, braiding machines for textile, ropes and wire 		

Easy to install

Installation

		SINAMICS V20 feature	Your benefits
Side-by-side mounting more Side-by-side mounting more No space required	Wall Push-through mounting	Compact design, side-by-side mounting and flexible device installation for both wall mounting and push-through mounting. Operation without additional option modules possible.	 Compact installation allows smaller cabinets to be used Push-through mounting allows the cabinet to be cooled more easily Can be run "out-of-the-box" without other options Basic operator actions at a built-in BOP (Basic Operator Panel)

Communication

	SINAMICS V20 feature	Your benefits
5	The communication port is available at the terminals. The preset parameters of the USS and MODBUS RTU are defined in the connection macro.	 Easy integration into existing systems Easy integration into micro automation systems Easier commissioning through standard libraries and connection macros

Proking modulo

Braking module			
SINAMICS V20	SINAMICS V20 feature	Your benefits	
Braking module Resistor	The dynamic energy is dissipated as heat in a braking resistor with an adjustable duty cycle of between 5 % and 100 %.	 Possible to use dynamic braking to increase braking performance Inverters ≥ 7.5 kW have an integrated braking module. In this case, the braking resistor can be directly connected. 	

Easy to use

Parameter cloning

SINAMICS V20 feature	Your benefits
Parameter settings can be easily transferred from one unit to another using the BOP (Basic Operator Panel) interface – or even without power supply by using the parameter loader.	 Less technical support required Short commissioning time The product is delivered to the customer already preset

Macro approach

Keep Running Mode

SINAMICS V20 feature	Your benefits
The function provides higher produc- tivity in production by automatic adaptation in the case of unstable line supplies.	 Stable operation under difficult line supply conditions Higher productivity through prevention of interruptions of the production line Adaptation to application-relevant reactions through flexible definition in case of fault/alarm

Robustness

**	
SINAMICS V20 Motor	

SINAMICS V20 feature	Your benefits
Wider voltage range, better cooling design and coated PCB increase robustness of the drive in difficult environments.	 Operation possible when the line supply voltage fluctuates Reliable operation for line voltages: 1AC 200 V 240 V (-10 % / +10 %) 3AC 380 V 480 V (-15 % / +10 %) Operation up to an ambient temperature of 60 °C

Easy to save money

Energy reduction during operation			
	SINAMICS V20 feature	Your benefits	
* 60% energy saving	Integrated ECO mode for V/f and V ² /f automatically adapts the flux to save energy. The energy consumption can be shown in kWh, CO ₂ or even in the local currency.	 Energy saving during low dynamic load cycles If the setpoint changes, the ECO mode is automatically deactivated Tells end users the actual energy that has been saved 	

Energy reduction during operation – DC coupling

	SINAMICS V20 feature	Your benefits
Energy generation Energy consumption Energy Energy SINAMICS V20 SINAMICS V20	Applications that use SINAMICS V20 drives with the same power rating can share a common DC bus to reuse the regenerative energy.	 Generate and save energy in applications that use coupled motors Multiple inverters can optimally share resources Reduce the need for dynamic braking and external components

Energy reduction during standby – hibernation mode

	SINAMICS V20 feature	Your benefits
f Save energy threshold	Inverter and motor only operate when the plant or machine requires them to. Hibernation mode will be activated automatically when the frequency demand or the feedback from a sensor drops below a specific threshold.	 Smart hibernation saves energy Extended lifetime of motor Reduced pump wear at low speed Less time to program PLC code for pump/fan applications (PLC)

* Application and machine-type dependent.

Easy automation system

Combining SIMATIC PLC with SINAMICS V20

Saving time and minimizing errors

- Easy system configuration with harmonized PLC libraries and predefined macros in the inverter
- One cable to connect SINAMICS V20 with USS or MODBUS RTU
- Integrated communication interface

Full range of options

Everything you need...

	Options			Options		
1	V20 BOP	Same function as the integrated BOP (Basic Operator Panel) The value and setpoint are changed by rotating the wheel • Connection between inverter and BOP • Integrated SD/MMC card slot for parameter cloning		Line reactor	Suppresses the harmonic currentImproves the power factor	
				Braking module	 Shortens the deceleration ramp time Suitable for 1 AC 230 V and 3 AC 400 V 	
2	BOP interface				Adjustable duty cycle from 5 % to 100 %FSD already has an integrated braking unit	
3	BOP cable	3 m cable with connectorsUp to 100 parameter sets with parameter settings can be written from the memory card to the inverter or saved from the inverter to the memory card without connecting the inverter to the line supply.		Braking	Dissipates regenerative energy as heat	
4	Parameter loader			resistor	5 % duty cycle as default setting	
				Output reactor	Longer motor cable	
5	Memory card	MMC or SIMATIC SD memory card Improved EMC performance Longer motor cable for FSA 		Shield	Optimum shield connection	
6	Line filter			connection kit	Strain relief	

Technical data

Power and control	
Voltage	1 AC 200 V 240 V (-10 % +10 %)
	3 AC 380 V 480 V (-15 % +10 %)
Supply frequency	50/60Hz
Line supply type	TN, TT, IT, TT earthed line
Power range	1 AC 230 V 0.12 3.0 kW (0.16 4 hp) 3 AC 400 V 0.37 15.0 kW (0.5 20 hp)
Overload	150 % rated output current for 60 sec
Output frequency	0 599 Hz resolution: 0.01 Hz
Pulse frequency	2 16 kHz
Control modes	Linear V/f, square law V/f, multi-point V/f, flux current control
Standards	
Standards	CE III C-tick KC
EMC standards	1AC 230 V with integrated line filter according to EN 61800-3 C2 3AC 400 V with integrated line filter according to EN 61800-3 C3
Features	
Ease of use	 Energy consumption monitoring Automatic restart Parameter cloning USS/MODBUS communication Connection and application macro Customized default values
Application	 Hibernation mode Slip compensation Keep running mode Kinetic buffering Flying start Motor staging BICO function Dual ramp Wobble function PID controller Super torque mode Hammer start Blockage clearing mode
Protection	 Frost protection Condensation protection Cavitation protection DC-link voltage control Load failure detection
Control	 ECO mode Imax control Flexible boost control Adjustable PWM modulation

Signal inputs and outputs Analog inputs Al1: bipolar current / voltage mode Al1: bipolar current / voltage mode Can be used as digital inputs Analog outputs AO: 0 ... 20 mA Digital inputs DI1-DI4, optically isolated PNP/NPN selectable by terminal DO1: transistor output D02: relay output - 250 V AC 0.5 A with resistive load - 30 V DC 0.5 A with resistive load

Connection diagram

Mounting and environment					
Degree of protection	IP20				
Mounting	Wall mounting, side-by-side mounting, push-through mounting for FSB, C and D				
Cooling	 FSA up to 0.75 kW: convection cooling FSA, FSB, FSC, FSD: power electronics cooled using heat sinks with external fan 				
Ambient temperature	In operation • 0 60 °C (32 140 °F) • 40 60 °C (104 140 °F) with derating Storage • -40 70 °C (-40 158 °F)				
Relative humidity	95 % (non-condensing)				
Altitude	 Up to 4000 m above sea level 1000 4000 m: output current derating 2000 4000 m: supply voltage derating 				
Motor cable length	 Unshielded cable: 50 m Shielded cable: 25 m; 10 m for FSA filtered version 				
Dynamic braking	Option module for FSA, FSB and FSC; integrated for FSD
